

GMO Statement

The company SANOVO Eiprodukte GmbH & Co. KG hereby confirms, that during the processing of the used shell eggs no "genetic treatment" is carried out and the production agents used for this processing are not genetically modified.

Such confirmations of the suppliers are available.

According to our purchasing specifications shell eggs in all stages of production and processing will be treated to ensure that they don't have to be declared according to the genetic modifying regulation (EU 1829/2003).

According to the Federation for Food Law and Food Science (BLL), neither the hens themselves nor the products derived from them are genetically modified.

SANOVO Eiprodukte GmbH & Co. KG
