

Data Sheet **SANOVO Hen Egg Albumen Powder Special Whip, art. no. 286.**

- Application:** Suitable for the confectionery and the bakery industry.
- Functionality:** The advantage of this product is especially the extra good whipping ability and good foam stability. A further advantage is the storage conditions, handling and shelf life of powder compared to liquid products.
- Product description:** Desugared, spray dried and pasteurised hen egg whites. 100 g of powder dissolved in 800-1000 g of water corresponds to 900-1100 g of fresh egg white (approx. 28-34 shell eggs.) It is recommendable to leave the solution to stand for a while before use in order to absorb all the water.
- Ingredients:** Hen Egg white powder, citric acid (E330), Xanthan gum (E415).
- Storage:** At ambient temperatures and non condensing atmosphere.
- Shelf life:** 24 months in unopened package - see storage conditions.
- Packaging:** Blue polybag in white paper bag, 20 kg. net.
- Production date:** Included in the batch number, as the first 3 digits is the day-number, and the fourth indicates the year.
- NB!** User is not absolved from his/her obligation to investigate and fulfill all requirements which are valid for the said product. User should contact the local SANOVO office for a discussion of specific requirements.
- Organoleptic information:**
- | | |
|------------------------|---|
| Appearance: | Amorphous, powder structure. |
| Colour: | Cream white, homogenous in the whole mass. |
| Odour and taste: | Typical, characteristic for hen eggs matter, without foreign odours and tastes. |
| Mechanical impurities: | Absent. |
